It simply keeps the mouse at a steady charge while in use, and charges (very slowly) while at rest.. And while a regular non-gaming wireless mouse may last months before the battery dies, the ultra-precise tracking and fast polling rates of gaming mice, together with a desire to keep them as lightweight as possible, means smaller batteries are included so you have to charge them up every few days.

logitech gaming mouse pad

With it, you'll never have to worry about plugging in your mouse, or docking it, or having to swap the battery for a fresh one.. Logitech's software is great, too It's straightforward, attractive, and intuitive.. And crucially, the software is lean and stable, so it won't hinder game performance.. TL;DR – These are the Best Wireless Gaming Mice: 1 Logitech G903Best Wireless Gaming MouseThe original Logitech G900 stole gamers' hearts last year with its incredibly robust wireless technology (that's every bit as

fast and stable as a wired mouse) and its stellar PWM3366 sensor.. For some, those are big deterrents For others, the joys of using a mouse untethered make these minor setbacks seem trivial.. As far as a wireless gaming mouse goes, there's not much else we could possibly ask for, except for maybe a lower price tag but you kind of expect a steep cost on a class-leading product like this.
